Littlite® AUTOMOTIVE

For over thirty years Littlite® has been the task light of choice in the entertainment industry. Our automotive series brings the same durability and reliability from the concert hall to your vehicle.

Our L-Series Automotive lampsets are available with 6, 12 or 18-inch goosenecks. Choose between our energy efficient LED series or the 5 watt halogen bulb series. LED models can be switched between a red or white color output. Halogen lampsets feature a full range dimmer and removable red color filter. All lampsets come with mounting hardware and wiring kits.

The L-5 series features an end-mount gooseneck that lays flat when not in use. Designed for a variety of surface mount applications, the L-5 is ideal for computer mounts and mobile workstations.

The L-6 includes a 12-volt power adapter that can be powered from any 12-Volt power point. Use one of our mounting accessories for a perfect light for various locations.

The L-9 series has our traditional top-mount gooseneck. Like the L-5, the 24" wiring exits the bottom of the chassis for a clean installation.

LCR Series

The Littlite LCR is designed for applications requiring a 12-volt, hard-wired task light. Easy to install and ideal as automotive map lights, marine chart lights, industrial machine lights and other surface mount applications. Constructed of sturdy steel components with an integrated on/off switch.

Stowlite

A handy, stowable, removable task light, the Stowlite plugs into any 12-volt power point and provides ample lighting from the 2.4-watt incandescent lamp. The Stowlite is small enough to fit in map pockets, glove compartments and stowage bins.

Models	Light Output	Gooseneck Length in Inches
L-5-LED	Switchable Red/White LED	12, 18
L-5	5-Watt Halogen	6, 12, 18
L-6-LED	Switchable Red/White LED	12, 18
L-6	5-Watt Halogen	6, 12, 18
L-9-LED	Switchable Red/White LED	12, 18
L-9	5-Watt Halogen	6, 12, 18
Stowlite	2.4-Watt Incandescent	6

Littlite LED lights are rated @60,000 hours @ 12 volts.

Littlite® LDC/CC/MULTI-VOLT

The Littlite Multi-volt range of products include the MV series, CC series LED task lights and the LDC dimmer converter products. Multi-volt products are designed to operate on a wide range of input voltage for heavy duty applications.

Littlite CC series uses constant current circuitry enabling a wider range of input voltage (8-28VDC), smoother LED dimming with no digital artifacts and more efficient operation.

Littlite MV series dimmers utilize PWM (pulse width modulation) to achieve both voltage regulation and dimming. They allow 12 volt lamps to operate on an input voltage of 12 to 28VDC. The MV is specially designed to regulate and dim incandescent lamps such as our Lo and HI series in any combination up to a 1-Amp total draw. 12 volt LED lamps may also be used in combination with incandescent. The MV is most useful controlling multiple 12 volt lamps with a single dimmer.

The Littlite LDC uses our MV dimmer to provide dimming control and voltage conversion for all Littlite products. Ideal for trucks, specialty vehicles, industrial machinery and other higher voltage applications. Operates on input voltage of 12-28VDC and provides dimming control for single or multiple LED and incandescent lamps and in any combination up to a 1-Amp total draw. Compatible with current Littlite power supplies and cable accessories.

Selected Littlite LED products are now listed by Underwriters Laboratories Inc. (see "Littlite LED UL Product List") www.littlite.com.

Littlite[®] History

Littlite[®] . . . the name is synonymous with high-quality gooseneck task lights. For over thirty years we have been producing, refining and improving our task light system to meet the needs of users all over the world.

Originally conceived as an accessory for sound and lighting consoles, the simple-yet-elegant Littlite products have become the standard work lamps of numerous industries, and are found around the globe in film and television studios, radio stations, dance clubs, live venues, emergency vehicles, medical and assembly equipment-wherever an unobtrusive, effective, localized task lamp is needed.

Not only are we committed to providing the best product possible, we also strive to offer the best service and support in the industry. Littlite products rarely fail, but if they do our Limited Lifetime Warranty ensures that you won't be in the dark for long. We do not make a disposable product and we are determined that the Littlite you buy today will be with you for years and years to come.

We do all of the good work with an eye towards environmentally friendly products and production processes. We strive to make thoughtful decisions regarding all aspects of our business in order to minimize the impact on our environment. Littlites do not contain lead or other hazardous substances and are ROHS compliant.

Today our goals are the same as they always have been; produce the best professional, versatile, flexible, durable gooseneck task light system and back it up with superior customer service.

Littlite[®] Trademark Policy

Use of the intellectual property of Littlite LLC including but not limited to our brand name "Littlite", the Littlite logo, the Littlite Liteprint and Littlite product images, as well as product descriptions from our website and literature (which are all copyrighted) are allowed at the sole discretion of and with the written permission of Littlite, LLC strictly for the promotion and sale of our products. Our trademarks must be displayed with the ® symbol and are not to be used generically or to refer to any products other than those manufactured by Littlite, LLC

Littlite[®] Warranty

Limited Lifetime Warranty

Littlite[®] products are covered by a limited lifetime warranty. Limitations include solid state circuitry, which is warranted for five years from date of manufacture, and bulbs, which are warranted to work when purchased.

Full warranty details are included with each gooseneck product and can be found on our web site, www.littlite.com.
